

AGUEDA BOLANO GONZALEZ Z HISZPANII

1st September 2013, I started my EVS experience and I move out to Białystok, in the northeast of Poland, for 10 long and cold months. Białystok where you can feel -20 degrees in winter, the night comes at 16.00 and you learn how to pronounce the name of the city, two weeks later.

What could have so special?

The EVS experience will not be better or worse if you are in one city or another. You will live a

really great experience if you are willing to adapt, accept, share and enjoy different cultures to yours.

Wolontariuszka w Specjalnym Ośrodku Szkolno-Wychowawczym w Białymstoku

CD...

In my case, I was so lucky because:

- I met wonderful people, I shared my life with them and now I can say that they are part of my family.

- I visited a lot of special places which maybe I would never go if I had not chosen this project in this region. The nature, the fresh air always are around you, wherever you are.

- I discovered my vocation about Especial Education and I learnt, more than ever, life values.

The Polish culture has a special charm. Maybe, at the beginning you are shocked or maybe you are afraid... what could I advise you?

Just you should discover it, explore it, ask about it, learn about it and enjoy it a lot because it is the funniest thing that you can do when you are far away from home.

And remember:

Don't be afraid of changes, to the unexpected because you will never be alone and you will never forget that for 10 months, you have been part of a very big family. And for sure, as a volunteer, we will always be in the memories and houses of some Polish people whom will always remember us! :)

So for all these reasons, I encourage you to do volunteer service because you will not regret! :)
