

Vincenzo

E stato bello vederti!

European Voluntary Service in Specjalny Ośrodek Szkolno-Wychowawczy w Białymstoku

My EVS memory by Vincenzo Abbruzzese

Is difficult to resume this experience on a paper... EVS is simply amazing, I loved almost every moment of this year in Białystok, and even it could sound something ordinary and classic to say, here I found something like a family: people from organizations and volunteers, sharing values and life moments, made my EVS much more complete than just the experience in the school.

Working with disabled children and having the possibility to feel really useful for them (just with your presence and your smile) is

something that fill yourself, but having also friends outside, having people on who you can always rely, well it's the best: I didn't really get homesick thanks to them and thanks to them I started to feel in Białystok like in my hometown. As I tried to live every moment in this way, filling my days with friends and activities, sharing moments and fun, in the school like outside, then I have a lot of good memories that I will always take in my heart. And now, after 10 months from my beginning, I could really say that the time flew: it seems yesterday when I was discovering the city with my flatmates, it seems yesterday when I had the on arrival training and when I got all

the documents for my staying in Poland!

So I will always be grateful to ANAWOJ and SOSW in Białystok because they made this experience real and they accepted me in their world, in a very open and nice way that it would be just impossible for me to not fit perfectly here!

Dziękuję bardzo ☺
