

DANIEL GALLARDO Z HISZPANII

In my project EVS I made sport activities, leisure activities, swim activities in special care center. I went to the camps, also I used to support disabled girl 1:1 in her house, I was taking part in multiple competitions inside and outside of my school.

I did outputs with childrens outside of school and I always

helped the teachers and children in all kind of activities.

In general i loved my project and for me everything went very good. My tasks and activities were as I expected while reading the project in Spain . The development of these were wonderful I had in every time somebody that helped me.

I would recommend EVS because the people have opportunity of develop language skills in other language. Meet people of different country and they can work with them.

The person's personality change because they will be more open-mind and will know more about Europe and other culture.

I think this opportunity of work in other country is great because this non-formal learning give to the people great competences for the teamwork and work with people.
