

Emine from Turkey

EVS in Poland/ Bialystok - Special Center of Care and Education, 02/2009-06/2009

As many young people I really wanted to go another European country. I sent my resume and motivation letter to Anawoj. After 5-6 months I got the answer. I was very happy and said to myself that was very interesting offer.

My project started 1st February 2009. It was about mentally and physically disabled children, for whom I was suppose to arrange time after lessons. I was working with the group of boys. I was playing games with them, watched tv. Everyday we were going to different places like swimming pool, ice ring or museum. Often on workshops we were cutting fish in wood or flower or angels. Sometimes we painted colorful pictures. Two times I cooked Turkish dishes.

I arranged sinning competition. At the end of the school I arranged picnic for the students and teachers. I didn't have to help there, but I really wanted, because I liked all the people working at the school so much.

I was very happy with my stay at school. I want to recommend projects in Poland all the people. I have never beet to other parts of he world, and I know other countries are also nice, but Poland and its soul that's something different.
